

I respectfully urge you to reject the National Association of Broadcasters petition 04-160. The fact is that the satellite service provides a better realtime service than that provided by the commercial broadcast stations is not a valid basis for the NAB to cry foul.

If you disallow the XMRadio Instant traffic and weather service then you must consider shutting down the 24 hour headline news and weather outlets.

Service provided to the listener, not government regulation, should be the basis of sucess of the service.

Please don't do to the satellite radio service what you have done to satellite TV.

Respectfully submitted,

Allen R Malone
